Scholarly Communication and Digital Curation

Want to share your research and scholarship? Interested in open access publishing? Need to comply with open access and data sharing policies?

The Georgia Tech Library is here to help you communicate your scholarship to the broader research community.

SMARTech

SMARTech is Georgia Tech’s trusted digital repository, established to preserve and provide long-term open access to your research and scholarship. SMARTech houses GT research reports, peer-reviewed faculty publications, theses and dissertations, data sets, recorded lecture series, and more.

To submit your scholarship to SMARTech, see http://smartech.gatech.edu. For more information, contact smartech@library.gatech.edu.

Open Access Services

We can help you provide open access to your peer-reviewed scholarly research. Our office provides support for:
- Complying with the GT Open Access Policy
- Complying with federal funding agency Open Access requirements
- Understanding author rights
- Publishing in Open Access journals
- Avoiding predatory publishers

For more information, contact Fred Rascoe, fred.rascoe@library.gatech.edu.

Research Data Services

The Library has the tools and resources to help you better manage your research data and make those data available to others. Services include:
- The DMPTool (dmp.cdlib.org) and consultations for data management planning
- Data archiving
- Data management instruction (classes count towards the Responsible Conduct of Research requirement)

For more information, contact Lizzy Rolando, lizzy.rolando@library.gatech.edu.

For more information about scholarly communication and digital curation services, including our lecture recording service, please see our website, http://library.gatech.edu/scdc/.
